

Yaxuan (Sean) Zhang

Minneapolis, MN 55414 | 651-200-0965 | zhan6322@umn.edu | [linkedin.com/in/yaxuan-zhang](https://www.linkedin.com/in/yaxuan-zhang) | github.com/YaxuanSeanZhang

EDUCATION

Ph.D., Geography (GIS) , University of Minnesota - Twin Cities (UMN), MN	May 2024
M.S., GIS, Computer Science (minor), University of Minnesota, MN (GPA: 3.84/4.0)	May 2024
B.Eng., GIS , Wuhan University, Wuhan, China (GPA: 3.78/4.0)	Jun 2018

SKILLS

Programming: R, Python, SQL, Git, HTML **Software:** ArcGIS, PostGIS, Stata, SPSS, Microsoft Office
Python Libraries: Pandas, Numpy, sklearn, PyTorch, TensorFlow, matplotlib, plotly, ArcPy, Geopandas
Skillset: urban mobility, transportation planning, GIS, cartography, statistical modeling, machine learning, forecasting

RELEVANT EXPERIENCES

-
- Urban Mobility Data Researcher**, University of Minnesota, Minneapolis, MN Jun 2021 – present
- Led a data collection process, designing surveys, media, and collecting GPS travel data from 1000+ participants
 - Applied data mining and statistical models to study gender discrepancies in mobility patterns to promote equity.
 - Adopted an interpretable ML algorithm to model health disparities related to mobility behaviors.
 - Delivered a recommendation report to external stakeholders (MnDOT) to inform policy-making decisions.
- Transportation Planning Data Science Intern**, Metropolitan Council, Saint. Paul, MN June 2023 – Aug 2023
- Designed a SQL pipeline to fetch, clean and process real-time traffic data into a web dynamic map dashboard.
 - Implemented a Generalized Additive Model (GAM) for traffic volume forecasting with temporal fluctuations.
 - Conducted QAQC, analysis and visualization for transit data and delivered insights to internal stakeholders.
- Mobility and Geospatial Data Analyst**, University of Minnesota, Minneapolis, MN Jun 2020 – May 2021
- Created an R pipeline for GPS travel survey, including data cleaning, mobility pattern analysis and visualization.
 - Automated data quality checking of geo-boundary and microdata, achieving 100%+ efficiency improvement.

DATA SCIENCE PROJECTS

-
- Spatiotemporal Urban Mobility Pattern Analytics**, research Sep 2020 – Sep 2022
- Developed a data-driven framework to address spatiotemporal quality issues in GPS mobility data.
 - Adopted ML methods and trajectory analysis to identify individuals' spatiotemporal mobility patterns.
 - Built a python pipeline to predict transfer stops and visualize trip route by combining transit data with GTFS.
- Invasive Species Monitoring and Geo-simulation System**, coursework Jan 2023 – May 2023
- Designed and implemented a real-time pipeline with three spatial interaction models, achieving 95.9% accuracy.
 - Published web maps utilizing a comprehensive toolkit including ArcPy, PostGIS, Google Cloud.
- ResNet Convolutional Neural Networks (CNN)**, coursework Jan 2023 – May 2023
- Performed feature extraction, AutoML, and CNN on electrocardiogram for heart disease classification.
 - Designed a multi-level Residual Network using PyTorch, improving 9.5% accuracy versus baseline CNN.
- Bayesian Modeling and Prediction**, coursework Jan 2021 – May 2021
- Improved model accuracy 20% using Bayesian Lasso versus frequentist methods for breast cancer diagnosis.
- Location Intelligence Business Analytics**, coursework Mar 2017 - Sep 2017
- Applied geospatial statistical models (e.g., GWR) to analyze spatial patterns of e-business in China.
 - Utilized multi-source data (e.g., POI, parcel) to conduct location-based analysis for business hotspot selection.

SELECTED PUBLICATIONS AND CONFERENCE PRESENTATIONS

Selections from 8 publications and 12 presentations

Zhang, Y., Li, C., Song, Y., Chai, Y., & Fan, Y. (2022). Personalizing the dichotomy of fixed and flexible activities in everyday life: deriving prism anchors from GPS-enabled survey data. *Transportation*, 1-26.

Zhang, Y., Song, Y., & Fan, Y. (2022). Improving data quality of smartphone-based activity-travel survey: A framework for data post-processing. *Transactions in GIS*, 26(1), 475-504
